

A glass bottle is pouring a stream of multi-colored water into a glass. The water is composed of various colors including red, orange, yellow, green, blue, and purple, creating a vibrant, rainbow-like effect. The glass is partially filled with this colorful liquid, and there are some bubbles visible. The background is white.

GLANCE

*Miniglance - Glance 730
Glance Plus - Maxiglance*

The logo for SINTERAMA, featuring a stylized white 'S' on a teal square background.

SINTERAMA

colours & yarns for weaving

One single base: a super bright polymer able to give these products a new type of brilliance.
One technology: air texturing, to give these yarns the typical handle of short-cut fibres.
One company able to make unlimited colours: **Sinterama**.

MINIGLANCE

Starting from a raw material of the same colours of Zerbion Lux 160/100, we propose two counts with a mélange effect created using two or three different colours, depending on the count:

2 ends of different colours = **MINIGLANCE DTEX 300**

3 ends of different colours = **MINIGLANCE DTEX 480**

Ideal for giving brightness and colour to the warps for upholstery fabrics as well as for the trendiest and most fashionable clothes or to the most sophisticated curtains.

GLANCE 730

Starting from a raw material of the same colours of Zerbion Lux 300/100, we propose this yarn with a count of **730 DTEX** and a mélange effect given by the use of two colours, to create endless combinations for the weft, from the warmer tones of gold to the coldest of the deeps of the sea.

GLANCE PLUS

Starting from a raw material of the same colours of Zerbion Lux 300/100, we propose a line of yarns with different mélange effects, made by mixing three to six different colours, depending on the count:

3 ends of different colours = **GLANCE PLUS DTEX 1000**

4 ends of different colours = **GLANCE PLUS DTEX 1400**

5 ends of different colours = **GLANCE PLUS DTEX 1800**

6 ends of different colours = **GLANCE PLUS DTEX 2100**

For an unlimited colours and brilliance explosion.

MAXIGLANCE

Create your own **GLANCE PLUS 1000 DTEX** and we then provide you with a yarn with a final count of 3000 or 9000 dtex having the same mélange effect of the **GLANCE PLUS** you created, but with an even more fascinating mélange effect.

PRODUCTION MINIMUM QUANTITY

2 ends: 40 kg.

3 ends: 60 kg.

4 ends: 80 kg.

5 ends: 100 kg.

6 ends: 120 kg.

Standard bobbin weight: 3.2 kg.
